

Thanks for your purchase! Included in this purchase are charts that talk about animals that are still living and animals that extinct. They can be used as teaching aides and references while teaching about extinct and extant animals. I included two copies of the living animals poster— one with the word LIVING on the poster and one with the word EXTANT, depending on which vocabulary you are using.

I utilized these in my classroom by having the students compare and contrast certain animals to see how they are similar and different. I used one pairing as a teacher model and then broke the students into groups according to class size (I did four students in each group). I created Venn diagrams on chart paper for them to list what they found. Photos of my students work is included at the end.

Here are the animal pairings that I used but you could arrange them as desired.

Giant Sloth & Grizzly Bear

Bengal Tiger & Saber Toothed Tiger

Tasmanian Tiger & Red Fox

Dodo Bird & Wild Turkey

Quagga & Wild Mustang

Irish Elk & White Tailed Deer

Woolly Mammoth & African Elephant

Happy teaching!!

*This is a link to silent video footage of the last Tasmanian Tiger in captivity before it died (I did the Tasmanian Tiger and Red Fox as my teacher model. My co-teacher did the Woolly Mammoth and the Elephant as her model.)

If you have any questions please contact me!!!

Mrs. Honeycutt

EXTINCT

Name: Giant Sloth

What did it eat?

Tress, Plants, and Twigs

Where did it live?

South America

How big was it?

8,000 pounds=

About the size of a
hummer

Name: Grizzly Bear

What does it eat?

Fish, Plants, Fruit

Where does it live?

North America

How big is it?

800 pounds=

About the size
of a small tractor

LIVING

Name: Grizzly Bear

What does it eat?

Fish, Plants, Fruit

Where does it live?

North America

How big is it?

800 pounds=

About the size
of a small tractor

EXTANT

EXTINCT

Name:

Saber Tooth Tiger

What did it eat?

Deer, Bison, Camelops

Where did it live?

North America

How big was it?

About 500 pounds =

About the size of a big motorcycle

LIVING

Name:

Bengal Tiger

What does it eat?

Deer, Pigs, Antelope

Where does it live?

Near China and India

How big is it?

200 pounds =

About the size of a big couch

EXTANT

Name:

Bengal Tiger

What does it eat?

Deer, Pigs, Antelope

Where does it live?

Near China and India

How big is it?

200 pounds =

About the size of a big couch

EXTINCT

Name:

Tasmanian Tiger

What did it eat?

Wallabies, Wombats, Birds

Where did it live?

Australia, Tasmania, New Guinea

How big was it?

About 60 pounds =

About the size of a toilet

LIVING

Name:
Red Fox

What does it eat?
Birds, Bugs, Fruit

Where does it live?
Australia, Tasmania, New

How big is it?
About 25 pounds =

About the size of 4 gallons of milk

EXTANT

Name:
Red Fox

What does it eat?
Birds, Bugs, Fruit

Where does it live?
Australia, Tasmania, New

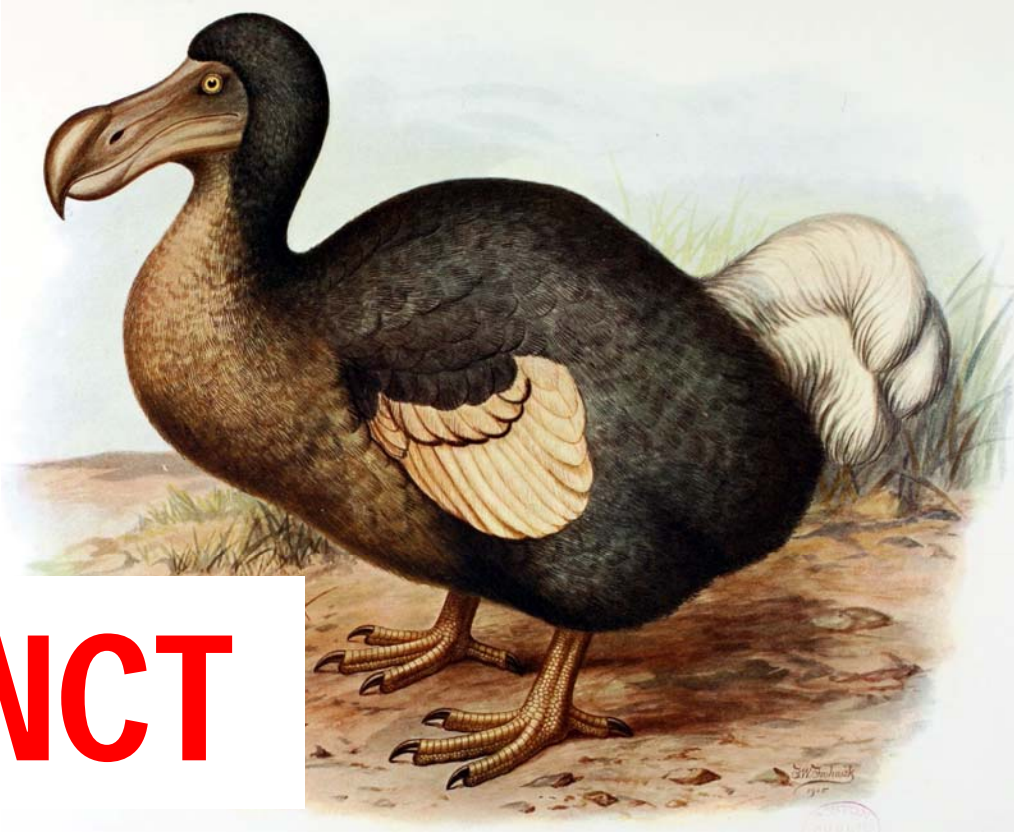

How big is it?
About 25 pounds =

About the size of 4 gallons of milk

EXTINCT

Name:
Dodo Bird

What did it eat?
Fruit, Seeds

Where did it live?
Mauritius Island

How big was it?
About 25 pounds =

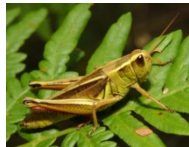

About the size of 4 gallons of milk

LIVING

Name:
Wild Turkey

What does it eat?
Seeds, Bugs, Fruit

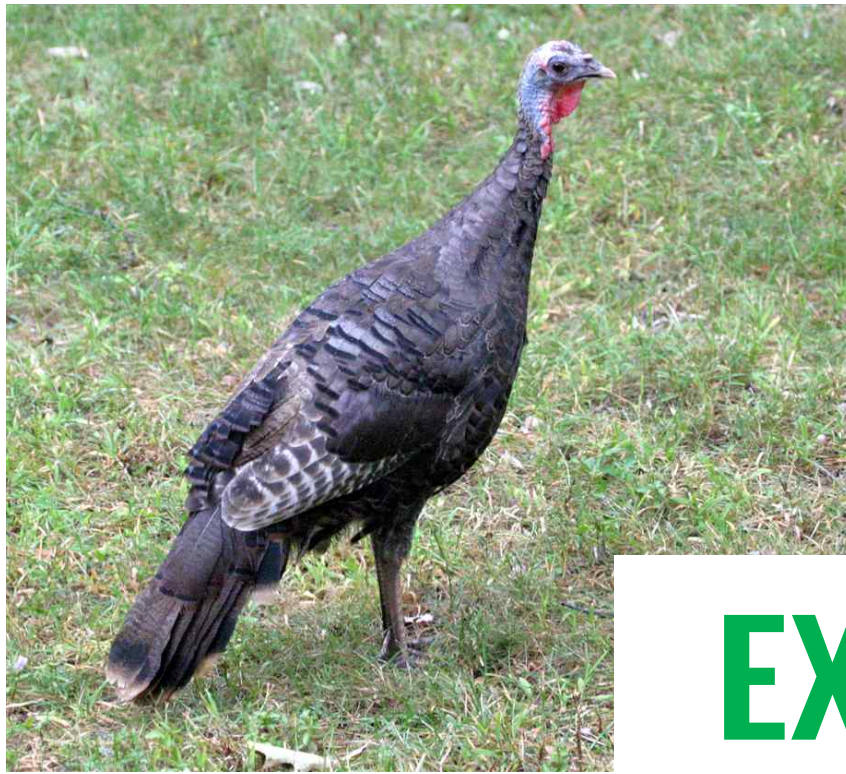

Where does it live?
North America

How big is it?
About 10 pounds =

About the size of a gallon of milk

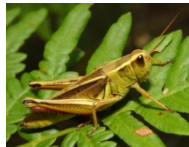

EXTANT

Name:
Wild Turkey

What does it eat?
Seeds, Bugs, Fruit

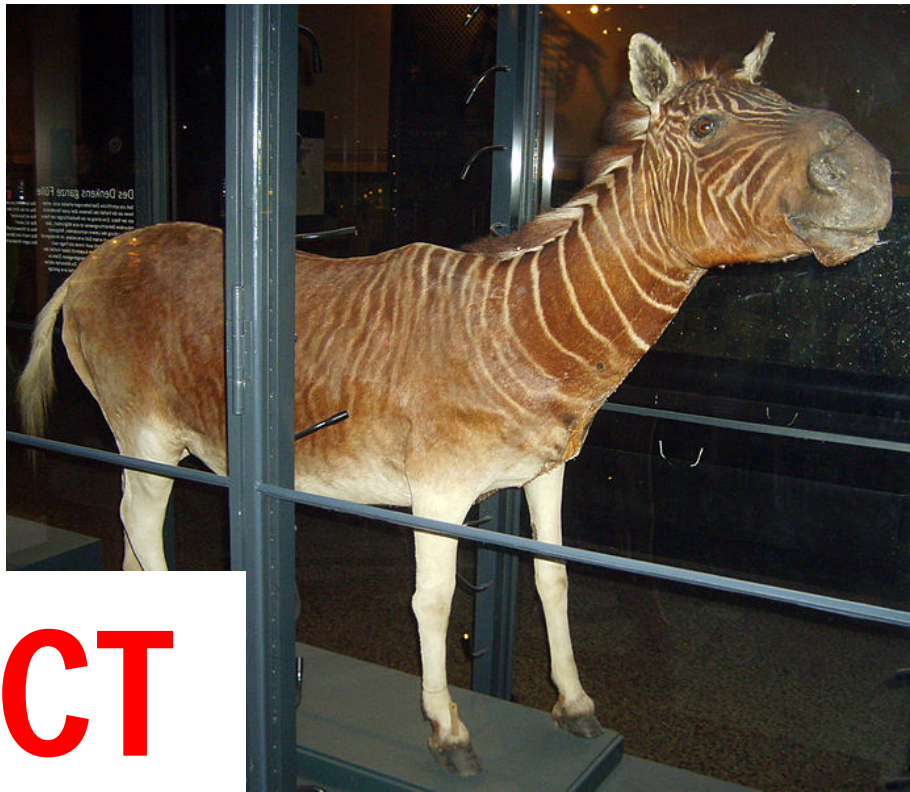

Where does it live?
North America

How big is it?
About 10 pounds =

About the size of a gallon of milk

EXTINCT

Name:
Quagga

What did it eat?
Grass, Fruit, Plants

Where did it live?
South Africa

How big was it?
About 500 pounds =

About the size of a big motorcycle

LIVING

Name:

Wild Mustang

What does it eat?

Grass, Plants

Where does it live?

North America

How big is it?

About 750 pounds =

About the size of a small tractor

EXTANT

Name:

Wild Mustang

What does it eat?

Grass, Plants

Where does it live?

North America

How big is it?

About 750 pounds =

About the size of a small tractor

EXTINCT

Name:
Irish Elk

What did it eat?
Grass, Plants

Where did it live?
*Ireland, North Europe,
Northern Russia*

How big was it?
About 1,500pounds =

About the weight of a smart car but much longer and taller

LIVING

Name:

White Tailed Deer

What does it eat?

Seeds, Plants, Fruit

Where does it live?

North & Central America

How big is it?

About 250 pounds =

About the size of a big couch

EXTANT

Name:
White Tailed Deer

What does it eat?
Seeds, Plants, Fruit

Where does it live?
North & Central America

How big is it?
About 250 pounds =

About the size of a big couch

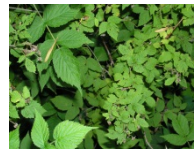

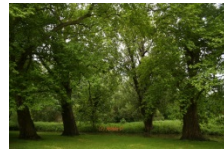

EXTINCT

Name:

Woolly Mammoth

What did it eat?

Trees, Plants

Where did it live?

*North America, Russia,
Northern Europe*

How big was it?

About 15,000pounds =

About the size of 2 Hummers

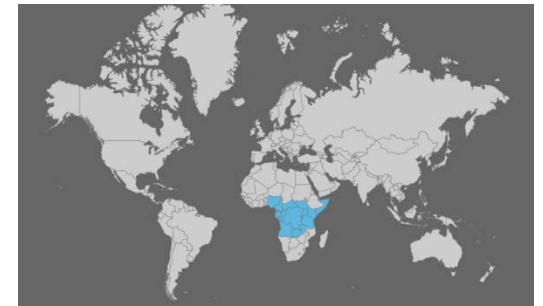

LIVING

Name:
African Elephant

What does it eat?
Plants, Fruit, Twigs

Where does it live?
Central Africa

How big is it?
About 11,000 pounds =

About the size of a large U-Haul Truck

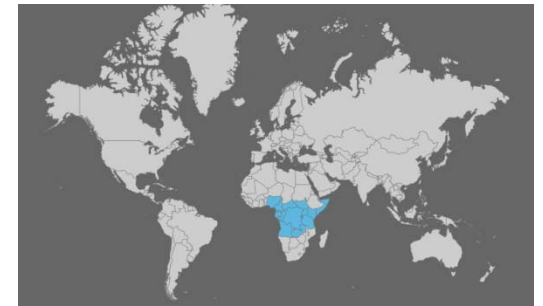

EXTANT

Name:
African Elephant

What does it eat?
Plants, Fruit, Twigs

Where does it live?
Central Africa

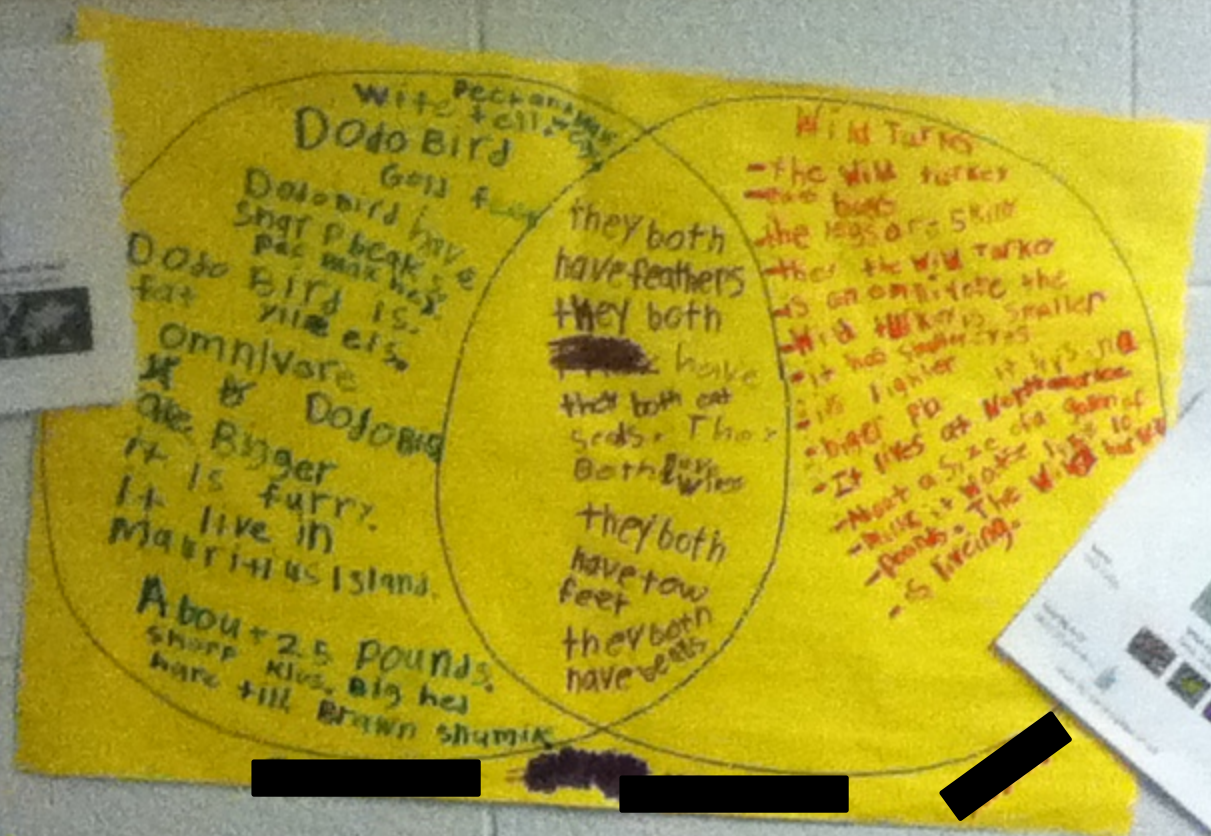

How big is it?
About 11,000 pounds =

About the size of a large U-Haul Truck
